To Whom It May Concern

This is to certify that the proposed courses from the project entitled “Curriculum Development for Sustainable Seafood and Nutrition Security, SSNS” have been included in the following educational programs of the College of Aquaculture and Fisheries, Can Tho University, Vietnam. The details are described as follows:

1. The course “**The nutritional value of seafood products, TS259**” has been newly added into the Bachelor Program of Fisheries Product Processing Technology (code 7504105)
2. The course “**Scientific research methodology, TSN606**” upgraded into “Research methodology and ethics in scientific research” in the Master Program in Aquaculture (code 6620301)
3. The course “**Aquatic food hygiene and safety, TS619**” has been upgraded into “Seafood for human nutrition and safety” in the Master Program in Aquaculture (code 6620301)
4. The course “**Aquaculture and the Environment**” has been newly added into the PhD program in Aquaculture (code 9620301)

The above mentioned courses have been newly added or upgraded in the revised educational program for the new batch starting from 2019 following the decision No 4235/QĐ-ĐHCT signed on September 26th, 2018 of “The establishment of education program adjustment committee”.

Yours sincerely,

Tran Thi Thanh Hien, PhD.

Associate Professor
Vice Rector
